Rendering Earth Crete Colors on walls

Cement base coat is rendered

Crete Color is mixed with water

Crete Color is rendered, smoothed and ready for final texture or stamp design. Silicone and Acrylic sealers are applied twice to provide gloss and natural finishes for UV protection and wear resistance.

Rendering Earth Crete Colors on floors and walkways

Floor prepared with reinforcement wire

Area is filled with Portland cement

Prior to drying, area is ready for coloring

Crete Color is applied and worked into wet cement.

Repeated a second time

Silicone Gloss or matte Acrylic sealer is applied twice to dry surface
